

April 19th, 2021

Aloha Lt. Governor Green,

We met when you were a Senator, supporting pesticide disclosure and school buffer zones from GMO seed companies, and had a great discussion about influenza vaccine mandates for HCW's. You were a man of integrity and I saw your heart. But a lot has changed, and you have changed. I cannot imagine being in your shoes.

It's time however to do right again by the people, and stop this **unscientific, discriminatory, and unconstitutional "vaccine passport"**. Hawai'i is amongst the most treasured vacation destinations in the world, but there is no ALOHA in "show us your papers." This digital identity is nothing more than the infrastructure for a total surveillance state. *Is this really the future you want for your children?* Americans are awakening to the slippery slope of centralized control by Big-tech, Big-pharma, and Big-gov, and will not allow this unprecedented attack on our fundamental human rights.

According to [this Highwire report](#), the American vaccine passport may already be dead:

*"Embattled Governor Andrew Cuomo and New York were left hanging in the wind after implementing their vaccine passport system, before the 'Great Reject' began happening in other states and then culminating with the White House exiting the idea."*

Any such system still implemented may be plagued with legal action for that state's foreseeable future.

As a physician, you are aware *the EUA, Covid-19, experimental vaccines have not been proven to prevent infection or transmission*. They may only provide *temporary*, personal protection from advanced disease. The vaccinated can still be a source of contagion, just as the unvaccinated - this fact alone renders granting privileges to the vaccinated through any kind of immunity "passport"- null and void.

According to federal regulations (45 CFR 46), it's illegal to force, mandate, coerce or incentivize participation in an ongoing clinical trial. Both the Pfizer and Moderna vaccines are still in clinical trials until their estimated completion in 2022 and 2023, respectively.

American citizens should neither be incentivized nor coerced to take any pharmaceutical product, particularly a "warp-speeded", non-FDA licensed, experimental, gene-therapy injection, that is exempt from injury liability, and has death as a known side effect.

"Vaccine passports" do not belong in a free society, rather are reflective of Nazi-era government efforts to segregate society into two tiers: the 'clean' (privileged, with access) and 'unclean' (restricted, stigmatized, marginalized). Many people cannot due to medical conditions, or will not due to religious or other beliefs, take this vaccine.

Many Americans are becoming more "vaccine hesitant" with the Governments' overzealous push to vaccinate on every corner. Amazing products never need to be given away for free, nor people bribed with donuts, peer-pressured by celebrities, or coerced by their employer into getting. Within a free-market society, good products sell themselves.

It's also time we stop requiring healthy people to "prove" they're not sick using the expensive, (EUA) PCR tests with "*not for diagnostic purposes*" written on their packages, and lab-manipulated cycle thresholds granting false positives when needed. If Kary Mullis were alive today, his PCR invention would never have been allowed to be used to create "casedemic" control around the world.

*We are no longer in an emergency.* A [new study](#) released by Professor John P. A. Ioannidis, a medicine and epidemiology professor at Stanford University, has found that the infection fatality rate (IFR) of COVID-19 is significantly less deadly than once thought, registering at a mere 0.15%.

*Kids especially are not at risk* of severe Covid disease. With CDC's own statistics reporting a 99.98% Covid survival rate, and 1 in 4 US kids having recently attempted suicide, the continued inhumane school restrictions on our children must cease. The current island-wide push to vaccinate our 16-17

year olds - *when Pfizer had only 53 kids in the vaccine trial group* - is medical negligence, not science. There is *ZERO long-term safety data* on this novel mRNA platform. Top vaccine experts (from GAVI) and many other scientists, including the ex VP of Pfizer, Dr. Yeadon, have raised valid concerns about the mRNA (gene-therapy) “vaccines” and their relationship to thrombosis, cancer, genetic alteration via reverse transcriptase, infertility, immune escape (creating more dangerous variants), and ADE (enhanced severity of Covid disease in the vaccinated). Of course the science here is not settled, yet the precautionary principle of medicine should be heeded, especially with children and pregnant women.

We recognize that our officials are charged with safeguarding public health by slowing the spread of infectious disease, but they also took a sworn oath to uphold such civil and constitutional rights as the right to travel freely among the states, the right to be secure in one’s person, the right to privacy and bodily integrity and the right to due process. One cannot be sacrificed or exchanged for the other.

It’s time to embrace the thousands of heavily censored and courageous, medical experts from around the world, who embody their medical creed to “first do no harm,” and are calling for “*focused protection*” of the Covid-vulnerable. There *are* early intervention, *effective therapeutics*, and the experimental vaccine is available for all those who want it.

Dr Green, lead and heal our beloved Hawai’i. Join several other states breathing freely, enjoying smiles, hugs, gatherings, laughter & joy. BE HUMAN AGAIN. Inspire human connection and unity rather than further divide. Most importantly, honor informed consent and medical privacy, the foundation of ethical healthcare, heed our Constitutionally-protected, *unalienable rights*, and stop harming our keiki - our future.

Sincerely,

Kim Haine

President, Children’s Health Defense - Hawai’i Chapter
